Subject: RE: Public Hearing Notice for the Planning Commission Meeting of December 20, 2023

Hi Scott,

I understand Julie Nelson has recently retired; I had been in contact with her a couple of times regarding rights of ways for MID Electric. I have recently been in contact with Brian Kroeger, and he suggested that I reach out to you and let you know that MID will need sufficient P.U.E.'s through the development(s) that are dedicating ROW for the Campus Parkway. MID will not be able to serve some of those developments because they are outside of the district boundary, but we will still need to extend utilities through them to complete the loop between the AME and CPW. Anything you can do to help us with P.U.E.'s through those developments is greatly appreciated, the developers are not going to be very cooperative because the MID Electric may not benefit their development, but It does benefit the community. If we are not able to go in a P.U.E. we will need to be in the City of Merced Road Right of Way which is not the best for everyone.

Thank you,

Kevin L. Malone
